

Applied Math Classes for Manufacturing, Trades, & Technology

Build the math skills you need to succeed in today's manufacturing and technical careers with *Applied Math for Manufacturing, Trades & Technology*. This FREE, 8-week, hands-on class covers practical concepts like measurements, fractions, conversions, geometry, and basic algebra. Taught through industry-relevant examples, the class helps you gain confidence using math the way it's applied on the job preparing you for your next step in work, training, or education.

Mondays & Wednesdays

June 8 – July 29

6 – 8 p.m.,

Ada County Center Mallard Building, Room 1108
9100 W. Black Eagle Drive
Boise, ID 83709

To make an appointment, scan the QR code or call
