Cryptography: Secret and Not-So-Secret Codes Throughout history, cryptography has evolved from messages written on the shaved heads of servants to highly robust computer encryption. In this course, we will examine the history of cryptography, study several cryptosystems, and practice techniques for cracking those cryptosystems. In addition, we will be examining our current level of dependence on cryptography, for instance, in our banking systems and cell phones. The mathematics required to understand and implement these cryptosystems is the equivalent of four years of high school mathematics. This class is designed to appeal to both history and math/science buffs alike! Hybrid course - has an online component							\$15.00

This course will focus on applying design thinking to harness our creativity and make it part of a process we can use to achieve important things and tackle challenges. Design thinking is-as discussed in the book Designing Your Life: How to Live a Well-Lived, Joyful Life-a method of solving difficult and complex problems through thinking creatively and testing ideas. We will focus on how to use design thinking to build possibilities for your future education, career, and life. [Build A Life You Love] Hybrid course - has an online component							\$15.00

<p>You Are What You Eat: Exploring Our Relationships with Food This course explores the complicated relationship between humans and their diet, using Michael Pollan's The Omnivore's Dilemma as a guide. In 21st century America, we have nearly limitless choices about what to eat. But those choices come with hidden costs. What we choose to eat affects everything from our personal physical and mental health to our communities to the global environment. Our diet may reflect deeply held ethical or religious beliefs. It may indicate our economic status or our cultural background. Or it may represent a mindful choice designed to fuel a healthy lifestyle. In this course, we will learn where our food comes from, how diet impacts our health, and what our individual diet choices mean within a global context. We will also learn practical tools and strategies to promote success in college and in life. Hybrid course - has an online component</p>

<p>Myths and Legends of the Spanish World In this class we will discuss a variety of Spanish Myths and Legends. Does La Llorona live in the water ready to gobble up unsuspecting children? Will the Chupacabra ever be caught? What are the origins of these and other legends and what can we learn about the cultural/historical context in which they originated? How do they compare with other legends we are familiar with? In this course we will investigate legends and the countries where they first appeared, and develop a variety of academic skills to allow us to think critically about the connection between history, culture, and literature. Format will include reading, writing, discussion, and presentations. Hybrid course - has an online component</p>

<p>Media and the Art of Lying Media and advertising companies pour millions of dollars into video content designed to engage and entice viewers. Are the designers' tactics sincere and honest? Or is there another side to this explosion of video content? What is the real effect of media on our thoughts and decisions? This course will take a look at the methods used to sell the individual and society products and ideas. Students will learn to analyze and evaluate various types of media and become more conscious viewers. Ultimately participants will learn how to make more-educated decisions and to use those same analytical skills to be more successful in college. Hybrid course - has an online component.</p>

<p>TED-CWI: Lessons Worth Learning TED, which stands for Technology, Entertainment, and Design, is an organization famous for its "ideas worth sharing" in the form of 20-minute video presentations. Many are familiar with TED Talks and have probably watched a few, such as Simon Sinek's "How Great Leaders Inspire Action". TED uses ideas to inspire change in attitudes, lives, and ultimately, the world. Using Ted Talks and Ted-Ed (ucation) as our platform, this course will provide strategies to be successful in college while simultaneously sparking and celebrating your own ideas about learning and how to apply those ideas to your education. The final project of this course will allow you to showcase your innovation and skills through the creation of your own TED-Ed Lesson on student success skills. <p>The Dead and the Undead Do you love The Walking Dead? Do you know how you would survive a zombie apocalypse? Are you obsessed with Dracula or Twilight? Have you ever thought about why we love zombies and vampires? This course will examine our fascination with zombies and vampires and what that reveals about our culture and ourselves. We will also look at traditions and beliefs surrounding death, particularly in American culture, but also throughout the world. Examining our cultural beliefs about death and our fascination with the undead will lead to examining other parts of our culture through a more critical lens, which will benefit students in all parts of their education, regardless of their primary area of study. This course will culminate in students showcasing analysis and research on a zombie specific area of interest. Hybrid course - has an online component</p>

Media and Self: Shaping Our Beliefs Media are central to culture and contribute daily to our communication, socialization, and core beliefs. The "ubiquitous assimilation" of information characterizes the 21st Century. Our beliefs about gender, race, and the consumption of goods from food to clothing to dwellings are influenced by a constant stream of media messages, oftentimes without our conscious awareness. In this course, we will explore these messages and their desired effects and develop ways to discern truth from propaganda, to effectively analyze media messages for function, intent and bias, and understand how this information contributes meaning to the lives of individuals and to society as a whole. YOLO: Existing in the Modern World You only live once is a popular tag line of our modern society. While some say it just started with a rap song, Soren Kierkegaard, a dusty old Dane who lived more than 150 years ago, had some ideas that look remarkably like the phrase we use today. Through a study of some of his main themes of philosophy such as 'passionate inwardness', 'subjectivity', 'the individual', and 'the leap of faith', we will go on a cultural treasure hunt to see these very popular themes reflected in the movies, music, and short stories that are all around us. By the time you have finished this course, you will be able to decide for yourself if Kierkegaard is indeed the first one with the hashtag YOLO. <p>Beyond the Academy Awards: Movies and Culture Most Americans, by the time they're eighteen, have watched more than a thousand movies. They can quote lines from Batman Returns and sing the entire sound track from Frozen. But do movies simply reflect our culture, or are they much more powerful, influencing the way we think, the choices we make, and how other people treat us? The purpose of this class is to examine these questions using a variety of contemporary American films, both narrative and documentary, as records of social attitudes and as a means for self-reflection and decision-making. <p>Designing My CWI Life: Solving Sticky and Wicked Problems Based upon design theory (specifically upon the thinking of Stanford professors Bill Burnett and Dave Evans in their book Designing Your Life: How to Live a Well-Lived, Joyful Life-this course explores how to create a student life at CWI and a career life beyond college that confronts and works through "sticky" and "wicked" (Burnett and Evan's terminology) problems-such as choosing a major or deciding which degree to pursue. Utilizing design theory tools such as curiosity, bias to action, reframing, awareness, and radical collaboration, we study how design theory translates and applies to designing effective approaches to sticky (college and career life problems) we all encounter (xxvi-xxviii). Keeping a "design" log of your research and explorations of your own sticky, wicked, or gravity problem builds toward the final project-a personal reflective essay that examines and analyzes your learning and design thinking progress throughout the semester. Two projects during the class will reinforce these ideals by recreating simulated murder investigations. The focus of this course is to learn the beginnings of the scientific method, critical thinking, quantitative reasoning, and interdisciplinary science by studying accounts of poisoners and the scientists who caught them. How Not to Die: Surviving the Extremes Why is it so hard to breathe at the top of Mt. Everest and why can't a scuba diver race to the surface from 90 feet underwater? We will explore those topics as well as the extreme survival conditions in the desert and out at sea. How does the human body adapt physiologically to maintain homeostasis when we are challenged to survive? Similarly, how can you survive and thrive as a college student? Let's explore all the ways to make smart decisions in conditions you will face in and out of a classroom. NOTE: Online sections of CWID are designed for students in fully online degrees. You Are What You Eat: Exploring Our Relationships with Food This course explores the complicated relationship between humans and their diet, using Michael Pollan's The Omnivore's Dilemma as a guide. In 21st century America, we have nearly limitless choices about what to eat. But those choices come with hidden costs. What we choose to eat affects everything from our personal physical and mental health to our communities to the global environment. Our diet may reflect deeply held ethical or religious beliefs. It may indicate our economic status or our cultural background. Or it may represent a mindful choice designed to fuel a healthy lifestyle. In this course, we will learn where our food comes from, how diet impacts our health, and what our individual diet choices mean within a global context. We will also learn practical tools and strategies to promote success in college and in life. Hybrid course - has an online component

Making Millions: Understanding Wealth This course equips students for college through the history, context, and modern reference points of capital as it moves through their lives. The origins of money, modern myths about wealth, disparities between and among groups, genders, ages, and cultures, taboos, vices, principles, manias, and more will be explored, allowing students to begin to build a values structure and personal concepts around worth, priorities, and reliance on self and others. Students will come away having participated in robust dialogue around money and will have an opportunity to explore realistic dimensions of wealth and value, and the chance to construct a perspective on assets that can serve them reliably throughout their lives. What Are the Chances? Newspapers love to splash big headlines about death by shark, but did you realize that you are more likely to be killed by a statistician than by a shark? This topic will take a light-hearted but rigorous approach to probability, giving you the opportunity to exercise some fairly simple mathematical operations while thinking about some fairly complex ideas. The theme will be approached from a variety of disciplines, looking not only at the mathematical concepts of probability, but also at its historical and philosophical underpinnings. Don't be afraid to sign up just because your math background is shaky! All calculations will be done with calculators, and nothing is more complex than simple addition, subtraction, multiplication, and division. About two-thirds of the material in this course is not covered in any other math course at CWI.

Really Good Bad Guys From the beginning of western theatre, we see characters who think they are doing the right thing, but as an audience we can see their actions as evil or treacherous. In this CWID class students will look at plays and literature showcasing protagonists with fatal, tragic flaws that turn "good guys" into "bad guys." We will be exploring how the ideas of a hero/antihero in theatre and in modern entertainment has shifted and how our own perceptions of what a protagonist should be has changed drastically in the last one hundred years. While learning about how the role and expectations of a hero have changed over time, students will also be learning strategies for being successful learners in college and beyond. Online Fake News in the Real World Is your news fake? When information is available on demand in every imaginable format, how can you tell what's credible and what's made up to influence, mislead, or make a buck? In this class we will apply a critical thinking lens to the way we evaluate and share information as a foundation for how we understand the world around us. From fake news to satire, biased reporting, editorial, and fact-based journalism, we will learn about the different types of news sources and their roles in informing or misinforming readers. We will further explore the way human psychology, social media, and the "echo chamber" effect contribute to the fake news phenomenon. This is an interdisciplinary course drawing primarily from information science, media studies, and psychology. You will learn practical strategies for assessing and evaluating everyday information, whether to write a paper, buy a car, understand a medical condition, or decide how to vote in the next election. In our modern world you need to have skills with mobile technology and the internet along with the communication tools to find your true love and win their heart. In this class we will develop the written and verbal communication skills used in romance. In this course, we will learn to learn from current research and your personal experiences to explore how to search for love and keep building true love from your continued learning that will last after the in-love experience has run its course. Moreover, we will learn how to "fight fair" making cultural connections in relationship and how to solve the problem of getting over someone without losing your cool. The college years are when many people meet their significant other. Additionally, there is a necessity in college to make and develop relationships that will use the same type of tools (yet not so intense) as do romantic relationships. <p>TED-CWI: Lessons Worth Learning TED, which stands for Technology, Entertainment, and Design, is an organization famous for its "ideas worth sharing" in the form of 20-minute video presentations. Many are familiar with TED Talks and have probably watched a few, such as Simon Sinek's "How Great Leaders Inspire Action". TED uses ideas to inspire change in attitudes, lives, and ultimately, the world. Using Ted Talks and Ted-Ed (ucation) as our platform, this course will provide strategies to be successful in college while simultaneously sparking and celebrating your own ideas about learning and how to apply those ideas to your education. The final project of this course will allow you to showcase your innovation and skills through the creation of your own TED-Ed Lesson on student success skills. <p>Welcome to The X-Men: Diversity & Discrimination as Explored by Marvel's "Mutants" One of the most popular imprints in the history of Marvel Comics, the "X-Men" serve to allow readers the ability to explore the complicated nature of diversity and discrimination in modern society. As intolerance based on race, religion, gender, sexuality and a variety of other factors permeate our news and social media, the "X-Men" present a popular cultural lens to consider the consequences of an "us vs. them" battle. This course will consider the role that diversity plays in our modern world, using the X-Men as a discussion focus as we explore common themes present in global diversity. Discussions will move through the history of the imprint, exploring themes of race, gender, and sexuality as modeled through the lens of the X-Men. The course will culminate with an assignment in which students will explore diversity and discrimination through the viewpoint of individual characters in the X-Men mythos. Idaho Authors and the West Our course content will deal with the American West. The American West conjures images of cowboys and outlaws, gold mines and uncharted wilderness, Wild West shows and Hollywood, vast, empty spaces and suburban sprawl. It has long been viewed as rugged territory where the hearty, the visionary, and the brave can claim fortune, freedom, and fame. It is a land as much myth as reality, full of contradiction and complexity. Literature has played its role creating, perpetuating, and debunking these myths. This course will introduce you to various Idaho writers and their writings. Through their fiction, non-fiction, and poetry-much of it set in the state of Idaho, we will explore the ever-changing West and analyze its many meanings. How do these writers and writings envision the West, and how do these visions fit with your own, as a College of Western Idaho student? Inspired by what we read, we will use our own Western experiences as material for the newest wave of Idaho-authored stories, memoirs, and poems. Heroic stories can inspire us to be persistent and resilient in the face of trials, whereas stories of villains can serve as a warning and strengthen our resolve. What factors lead to an individual's success or failure? Various case studies will be examined relating to topics such as culture, opportunity, personality, genius, persistence, and achievement. This is an interdisciplinary course, primarily drawing from sociology, psychology and history. You will be able to develop practical tools to define your own personal and professional goals and determine how you can overcome obstacles to achieve your goals. Stories have fascinated humans for thousands of years; guidance, enlightenment, and inspiration await us there. But what about the most important story you will ever encounter.the story of your own life? Is your life story one of power and accomplishment or one of confusion and impotence? Is that story soundly plotted or does it muddle along unguided? Is it written well, so that you and others can benefit from it? Most importantly, who is the author of your life story? Are you its plot master or is someone else penning the words while you just try to keep up? In this class, we will explore what story is, how stories are constructed, and what makes a story good. By sharing a few great stories we will buttress our understanding. And you will write a story of your own life - both the past you have already lived and the potential you want to fulfill. Ada County Campus What Are the Chances? Newspapers love to splash big headlines about death by shark, but did you realize that you are more likely to be killed by a statistician than by a shark? This topic will take a light-hearted but rigorous approach to probability, giving you the opportunity to exercise some fairly simple mathematical operations while thinking about some fairly complex ideas. The theme will be approached from a variety of disciplines, looking not only at the mathematical concepts of probability, but also at its historical and philosophical underpinnings. Don't be afraid to sign up just because your math background is shaky! All calculations will be done with calculators, and nothing is more complex than simple addition, subtraction, multiplication, and division. Nampa Campus What Am I Worth? You have worked hard to get an education (or you are working hard to get an education) and it's time to exchange your knowledge with a paycheck. A paycheck is just a bunch of dollars until you use them. Are these dollars a tool or a convenience? Will you tell your money where it will go? Or will you wonder where it went? You will gain tools in this course to manage your personal financial cash flow in addition to gaining tools to help you navigate through your CWI experience. CWID-101-056H Ada County Campus The Backpacker's Guide to Life: Reaching Your School, Career, and Life Goals With the ultimate backpacking adventure, a climb of Mount Everest as its theme, this course explores the complicated relationship between humans and their interactions with nature and each other. How do setting our goals, sometimes too high (literally and figuratively) help or hinder our work and life relationships. We will research and discuss the dynamics of teamwork and working with others, recognizing the strengths and weaknesses of ourselves and those we are with. We will also define and apply critical and creative thinking skills, realizing that is sometimes acceptable to modify goals and actions that can change with our personal situation and life circumstances. CWID-101-057H Ada County Campus You Are What You Eat: Exploring Our Relationships with Food This course explores the complicated relationship between humans and their diet, using Michael Pollan's The Omnivore's Dilemma as a guide. In 21st century America, we have nearly limitless choices about what to eat. But those choices come with hidden costs. What we choose to eat affects everything from our personal physical and mental health to our communities to the global environment. Our diet may reflect deeply held ethical or religious beliefs. It may indicate our economic status or our cultural background. Or it may represent a mindful choice designed to fuel a healthy lifestyle. In this course, we will learn where our food comes from, how diet impacts our health, and what our individual diet choices mean within a global context. We will also learn practical tools and strategies to promote success in college and in life. Hybrid course - has an online component. CWID-101-058W Online Heroes and Villains What does it mean to be a hero or a villain? We will consider both famous and obscure examples of unique individuals and their circumstances. Heroic stories can inspire us to be persistent and resilient in the face of trials, whereas stories of villains can serve as a warning and strengthen our resolve. What factors lead to an individual's success or failure? Various case studies will be examined relating to topics such as culture, opportunity, personality, genius, persistence, and achievement. This is an interdisciplinary course, primarily drawing from sociology, psychology, and history. You will be able to develop practical tools to define your own personal and professional goals and determine how you can overcome obstacles to achieve your goals. Be the Author of Your Life Story Do you love stories? If you do, you're in good company! Stories have fascinated humans for thousands of years; guidance, enlightenment, and inspiration await us there. But what about the most important story you will ever encounter.the story of your own life? Is your life story one of power and accomplishment or one of confusion and impotence? Is that story soundly plotted or does it muddle along unguided? Is it written well, so that you and others can benefit from it? Most importantly, who is the author of your life story? Are you its plot master or is someone else penning the words while you just try to keep up? In this class, we will explore what story is, how stories are constructed, and what makes a story good. By sharing a few great stories we will buttress our understanding. And you will write a story of your own life - both the past you have already lived and the potential you want to fulfill. Join us, pick up the pen, enhance your literary and academic skills, and become the author of your own success at CWI and beyond! Hybrid course - has an online component

Beyond Downton Abbey It's fun to speculate how the other half lived, and none lived more lavishly and more fully than the British aristocracy. Downton Abbey shows us the lives of one family living before and through the interwar period. The family represents a class of people that was poor in cash but rich in power, property, and peerage. This course will look at the people that made up this class, analyzing what levels of power and control they had after WWI and through the interwar period; what ideals, thoughts, and structures made up the aristocratic sensibilities; and how their power declined after WWII. We'll not only look at the mainstream aristocrats but at radical political rebels and empowered women. Hybrid course - has an online component

Media and the Art of Lying Media and advertising companies pour millions of dollars into video content designed to engage and entice viewers. Are the designers' tactics sincere and honest? Or is there another side to this explosion of video content? What is the real effect of media on our thoughts and decisions? This course will take a look at the methods used to sell the individual and society products and ideas. Students will learn to analyze and evaluate various types of media and become more conscious viewers. Ultimately participants will learn how to make more-educated decisions and to use those same analytical skills to be more successful in college. Hybrid course - has an online component

Fake News in the Real World Is your news fake? When information is available on demand in every imaginable format, how can you tell what's credible and what's made up to influence, mislead, or make a buck? In this class we will apply a critical thinking lens to the way we evaluate and share information as a foundation for how we understand the world around us. From fake news to satire, biased reporting, editorial, and fact-based journalism, we will learn about the different types of news sources and their roles in informing or misinforming readers. We will further explore the way human psychology, social media, and the "echo chamber" effect contribute to the fake news phenomenon. This is an interdisciplinary course drawing primarily from information science, media studies, and psychology. You will learn practical strategies for assessing and evaluating everyday information, whether to write a paper, buy a car, understand a medical condition, or decide how to vote in the next election. Health Shenanigans This course will explore current fallacies related to being in a state of "good health." Students will learn how to scrutinize health information to identify fraudulent or ill-informed advertisements that claims to alter the human condition (often for financial gain). People might be awed by fanciful research studies or unreasonable promises. These tactics may promote fear and devalue legitimate science. At the end of this course, students will have learned to be educated consumers, adopting skills that will lead to academic success, and improved ability to decipher the information that surrounds us. The "ubiquitous assimilation" of information characterizes the 21st Century. Our beliefs about gender, race, and the consumption of good from food to clothing to dwellings are influenced by a constant stream of media messages, oftentimes without our conscious awareness. In this course, we will explore these messages and their desired effects and develop ways to discern truth from propaganda, to effectively analyze media messages for function, intent and bias, and understand how this information contributes meaning to the lives of individuals and to society as a whole. What goes into creating an elite athlete or being the best team in the world? Science and lots of it! Science plays a key role in how athletes train, how they compete, what they eat, and, unfortunately, how they cheat. Throughout the term this course explores a range of topics in the world of science in sports including, sports nutrition, sports performance, sport injury and doping in sport. In addition to all these topics students will be able to have several first hand experiences in the CWI Human Performance and Health Lab to perform certain sport specific tests to see where they stand when compared to the best athletes in the world. Using Design Thinking to Build a Life You Love Many of us want to be creative and often work to find creative outlets, but most people have yet to examine how to use the creative process purposefully. This course will focus on applying design thinking to harness our creativity and make it part of a process we can use to achieve important things and tackle challenges. Design thinking is-as discussed in the book Designing Your Life: How to Live a Well-Lived, Joyful Life-a method of solving difficult and complex problems through thinking creatively and testing ideas. What does it mean to transform the world? It's an idea you'll hear as you begin your college journey, and this class will examine what that transformation can look like. We'll start building our classroom community by telling the stories of ourselves and our people; we will connect with each other by listening, reflecting, and thinking critically about the stories we tell ourselves and the world around us. Students will share their voices through oral storytelling and creative writing, and examine what the world can look like when it's rooted in interdependence, resilience, and regeneration.
