Courses are offered entirely online through technology with designated meeting times and designed for students who learn better with real-time instruction. Remote courses are similar to online courses except the student logs into class at their regularly scheduled time, and the instructor leads the course in real-time via technology (e.g. Teams, Zoom, Collaborate, etc). The frequency of designated meeting times varies by course. Meeting times may be substituted with online learning.

Nampa Campus	Academic Building	309	26	26	ericminer@cw.edu	8:30 AM	9:45 AM	
<p>Be the Author of Your Life Story Do you love stories? If you do, you're in good company! Stories have fascinated humans for thousands of years; guidance, enlightenment, and inspiration await us there. But what about the most important story you will ever encounter.the story of your own life? Is your life story one of power and accomplishment or one of confusion and impotence? Is that story soundly plotted or does it muddle along unguided? Is it written well, so that you and others can benefit from it? Most importantly, who is the author of your life story? Are you its plot master or is someone else penning the words while you just try to keep up? In this class, we will explore what story is, how stories are constructed, and what makes a story good. By sharing a few great stories we will buttress our understanding. And you will write a story of your own life - both the past you have already lived and the potential you want to fulfill. Join us, pick up the pen, enhance your literary and academic skills, and become the author of your own success at CWI and beyond! Courses are offered with added flexibility allowing students to choose between in-person or virtual (remote or online as designated by the class schedule). Students are able to attend class in-person or virtually. Virtual may be remote (designated meeting times) or online. Hyflex enables students to participate in class, in-person or virtually, without sacrificing learning outcomes. For those students that choose the virtual option, they will refer to the class schedule to determine if it is remote or online. The frequency of designated meeting times may vary by course and meeting times may be substituted with online learning.</p>

<p>You Are What You Eat: Exploring Our Relationships with Food This course explores the complicated relationship between humans and their diet, using Michael Pollan's The Omnivore's Dilemma as a guide. In 21st century America, we have nearly limitless choices about what to eat. But those choices come with hidden costs. What we choose to eat affects everything from our personal physical and mental health to our communities to the global environment. Our diet may reflect deeply held ethical or religious beliefs. It may indicate our economic status or our cultural background. Or it may represent a mindful choice designed to fuel a healthy lifestyle. In this course, we will learn where our food comes from, how diet impacts our health, and what our individual diet choices mean within a global context. We will also learn practical tools and strategies to promote success in college and in life. Hybrid course - has an online component</p>

Online Myths and Legends of the Spanish World In this class we will discuss a variety of Spanish Myths and Legends. Does La Llorona live in the water ready to gobble up unsuspecting children? Will the Chupacabra ever be caught? What are the origins of these and other legends and what can we learn about the cultural/historical context in which they originated? How do they compare with other legends we are familiar with? In this course we will investigate legends and the countries where they first appeared, and develop a variety of academic skills to allow us to think critically about the connection between history, culture, and literature. Format will include reading, writing, discussion, and presentations. NOTE: Online sections of CWI are designed for students in fully online degrees. Using Design Thinking to Build a Life You Love Many of us want to be creative and often work to find creative outlets, but most people have yet to examine how to use the creative process purposefully. This course will focus on applying design thinking to harness our creativity and make it part of a process we can use to achieve important things and tackle challenges. Design thinking is-as discussed in the book <i>Designing Your Life: How to Live a Well-Lived, Joyful Life</i> -a method of solving difficult and complex problems through thinking creatively and testing ideas. We will focus on how to use design thinking to build possibilities for your future education, career, and life. Courses are offered entirely online through technology with designated meeting times and designed for students who learn better with real-time instruction. Remote courses are similar to online courses except the student logs into class at their regularly scheduled time, and the instructor leads the course in real-time via technology (e.g. Teams, Zoom, Collaborate, etc). Online Movies and Documentaries that Move Us Do you like films and documentaries that are inspiring, uplifting, and intriguing? Do you wonder whether they can move people to action? The classroom, with all its inherent drama, conflict, and diversity, has provided the perfect setting for many books and movies in our culture. In this course we'll explore how education portrayed in cinema and literature compares to the real world, and we'll have some fun along the way. Additionally, we'll discuss how adults learn, in both a traditional and online environment. Students completing this course will be better prepared to succeed in college and in life. Whether you are just curious about how movies and documentaries influence our lives or perhaps you are considering a career in teaching, join us to uncover the tips and tricks to achievement in school, and beyond. Online Fantastical Futures and What They Teach Us Science fiction is a genre that explores not only a fantastical future or alternative present, but it also plays a pivotal role in critically examining our current societies. Through literature and film, we will investigate the larger questions of what it means to exist on earth today. How are science and technology shaping our societies? What are humanity's greatest challenges? What role can science fiction play in helping us understand our own communities and ourselves, and ultimately, what it means to be human? Courses are offered entirely online through technology with designated meeting times and designed for students who learn better with real-time instruction. <p>Applying Mindfulness for College Success What is mindfulness? What does it mean to be mindful? How mindful are you? This course aims to provide an overview of mindfulness (the ability to recognize and be aware of one's own thoughts or actions in a non-judgmental way) and relate this to the college experience as a student at CWI. We will cover many core concepts of being a student, study skills, learning styles, policies, and other formal aspects of education - but we will also be looking at how to be a more mindful person and what that means. We will cover aspects of the foundations, health, psychology, philosophy, and even politics of mindfulness. This course is partial experiential learning, which means there are Meditation Labs and exercises that will require you to be an active participant in this course. The best way to learn about mindfulness is through direct experience! We will learn ways of being more mindful through practices from the MBSR (Mindfulness-Based Stress Reduction) program. You will need to bring honest introspection and intent to this course - what you experience and feel really matters! This also means that what you get out of this course, at least partially, will be determined by the honesty and sincerity you bring to it! For some, mindfulness is a therapy, for others a technology, and for some it's a lifestyle choice - what does mindfulness mean to you? Let's find out! <p>The Backpacker's Guide to Life: Reaching Your School, Career, and Life Goals With the ultimate backpacking adventure, a climb of Mount Everest as its theme, this course explores the complicated relationship between humans and their interactions with nature and each other. How do setting our goals, sometimes too high (literally and figuratively) help or hinder our work and life relationships. We will research and discuss the dynamics of teamwork and working with others, recognizing the strengths and weaknesses of ourselves and those we are with. We will also define and apply critical and creative thinking skills, realizing that is sometimes acceptable to modify goals and actions that can change with our personal situation and life circumstances. Courses are offered with added flexibility allowing students to choose between in-person or remote course delivery options at designated meeting times. The frequency of designated meeting times varies by course. Meeting times may be substituted with online learning.</p>

<p>Beyond the Academy Awards: Movies and Culture Most Americans, by the time they're eighteen, have watched more than a thousand movies. They can quote lines from Batman Returns and sing the entire sound track from Frozen. But do movies simply reflect our culture, or are they much more powerful, influencing the way we think, the choices we make, and how other people treat us? The purpose of this class is to examine these questions using a variety of contemporary American films, both narrative and documentary, as records of social attitudes and as a means for self-reflection and decision-making. <p>Reading and Navigating through Idaho Whitewater Idaho is considered the "whitewater playground" for river enthusiasts. The state boasts numerous whitewater river trips that are easily accessible for day or multiday trips. River adventures will provide an experience you will never forget. How you remember the trip completely depends on your planning, preparedness and appreciating the force of Mother Nature. Those who take the time to understand, respect and utilize the energy of the river will undoubtedly return time and again to create memories that last a lifetime. This course will compare the enthusiasm of whitewater rafting to the enthusiasm of higher education learning. Both fields require extensive research, planning, goal setting, mentoring, first-hand experience, support and navigation to have a positive, successful experience. Each concept of whitewater rafting preparation will parallel a concept of preparing for and being successful in college. Hybrid course - has an online component</p>

<p>Transformative Storytelling: Shift Your World View            Angela Davis said, "You have to act as if it were possible to radically transform the world. And you have to do it all the time." What does it mean to transform the world? It's an idea you'll hear as you begin your college journey, and this class will examine what that transformation can look like. We'll start building our classroom community by telling the stories of ourselves and our people; we will connect with each other by listening, reflecting, and thinking critically about the stories we tell ourselves and the world around us. Students will share their voices through oral storytelling and creative writing, and examine what the world can look like when it's rooted in interdependence, resilience, and regeneration. <p>Wrestling With Culture From carnival origins to an industry worth billions, professional wrestling is a firmly embedded fixture in the entertainment world. Whether American WWE-style, Japanese puroresu, or Mexican lucha libre, professional wrestling explores age-old tales through the theatrical combat of the "squared circle." In this course, students will explore professional wrestling as a lens for understanding culture. Specific focus will be placed on fan culture, the connection between wrestling styles and cultural values, and the role masculinity plays in all of it. Part wrestling history class, part cultural studies course, "CWI 101: Wrestling with Culture" will guide students through their first semester at CWI while providing them with the tools to better understand the role culture plays in our entertainment. <p>Media and Self: Shaping Our Beliefs Media sources are central to culture and contribute daily to our communication, socialization, and core beliefs. The "ubiquitous assimilation" of information characterizes the 21st Century. Our beliefs about gender, race, and the consumption of good from food to clothing to dwellings are influenced by a constant stream of media messages, oftentimes without our conscious awareness. In this course, we will explore these messages and their desired effects and develop ways to discern truth from propaganda, effectively analyze media messages for function, intent and bias, and understand how this information contributes meaning to the lives of individuals and to society as a whole. <p>Fake News in the Real World Is your news fake? When information is available on demand in every imaginable format, how can you tell what's credible and what's made up to influence, mislead, or make a buck? In this class we will apply a critical thinking lens to the way we evaluate and share information as a foundation for how we understand the world around us. From fake news to satire, biased reporting, editorial, and fact-based journalism, we will learn about the different types of news sources and their roles in informing or misinforming readers. We will further explore the way human psychology, social media, and the "echo chamber" effect contribute to the fake news phenomenon. This is an interdisciplinary course drawing primarily from information science, media studies, and psychology. You will learn practical strategies for assessing and evaluating everyday information, whether to write a paper, buy a car, understand a medical condition, or decide how to vote in the next election. <p>Heroes and Villains What does it mean to be a hero or a villain? We will consider both famous and obscure examples of unique individuals and their circumstances. Heroic stories can inspire us to be persistent and resilient in the face of trials, whereas stories of villains can serve as a warning and strengthen our resolve. What factors lead to an individual's success or failure? Various case studies will be examined relating to topics such as culture, opportunity, personality, genius, persistence, and achievement. This is an interdisciplinary course, primarily drawing from sociology, psychology and history. <p>Online                      YOLO: Existing in the Modern World "You only live once" is a popular tag line of our modern society. While some say it just started with a rap song, Soren Kierkegaard, a dusty old Dane who lived more than 150 years ago, had some ideas that look remarkably like the phrase we use today. Through a study of some of his main themes of philosophy such as "passionate inwardness," "subjectivity," "the individual," and "the leap of faith," we will go on a cultural treasure hunt to see these very popular themes reflected in the movies, music, and short stories that are all around us. By the time you have finished this course, you will be able to decide for yourself if Kierkegaard was indeed the first one to claim YOLO. <p>The American Story The United States is a nation from various backgrounds including those of early colonizers, immigrants, indigenous populations, enslaved, Latinx, and refugees. This interdisciplinary course will give students an opportunity to explore the themes that have resulted in The American Story: culture, heritage, and historical context. This course will provide you with both practical successful student strategies and better awareness and understanding of America's rich diversity. NOTE: Online sections of CWI are designed for students in fully online degrees. Students who are taking any face-to-face classes should select a face-to-face or hybrid section of CWI.</p>

<p>Media and the Art of Lying Media and advertising companies pour millions of dollars into video content designed to engage and entice viewers. Are the designers' tactics sincere and honest? Or is there another side to this explosion of video content? What is the real effect of media on our thoughts and decisions? This course will take a look at the methods used to sell the individual and society products and ideas. Students will learn to analyze and evaluate various types of media and become more conscious viewers. Ultimately participants will learn how to make educated decisions and to use those same analytical skills to be more successful in college. Courses are offered entirely online through technology with designated meeting times and designed for students who learn better with real-time instruction. Remote courses are similar to online courses except the student logs into class at their regularly scheduled time, and the instructor leads the course in real-time via technology (e.g. Teams, Zoom, Collaborate, etc). The frequency of designated meeting times varies by course. Meeting times may be substituted with online learning.</p>

<p>Online TED-CWI: Lessons Worth Learning TED, which stands for Technology, Entertainment, and Design, is an organization famous for its "ideas worth sharing" in the form of 20-minute video presentations. Many are familiar with TED Talks and have probably watched a few, such as (insert example of popular talk?). TED uses ideas to inspire change in attitudes, lives, and ultimately, the world. Using Ted Talks and Ted-Ed(ucation) as our platform, this course will provide strategies to be successful in college while simultaneously sparking and celebrating your own ideas about learning and how to apply those ideas to your education. The final project of this course will allow you to showcase your innovation and skills through the creation of your own TED-Ed Lesson on student success skills. NOTE: Online sections of CWI are designed for students in fully online degrees. Students who are taking any face-to-face classes should select a face-to-face or hybrid section of CWI.</p>

<p>Language and Identity How literate are you? What parts of your life does literacy affect? What role does a person's speech and writing play in first impressions and stereotypes? Does your lexicon determine whether or not you get a job? A date? Should it? What causes linguistic stereotypes, such as French being the language of love and German the language of war? These questions and more will be addressed through movies, social media and literature. We will explore how the basic building blocks of language affect communication and how language and culture impacts a person's identity and their perspective of the world. Students will learn how an awareness of language and identity can help them to better navigate and participate in a multilingual world. Hybrid course - has an online component</p>

Using Design Thinking to Build a Life You Love Many of us want to be creative and often work to find creative outlets, but most people have yet to examine how to use the creative process purposefully. This course will focus on applying design thinking to harness our creativity and make it part of a process we can use to achieve important things and tackle challenges. Design thinking is-as discussed in the book Designing Your Life: How to Live a Well-Lived, Joyful Life-a method of solving difficult and complex problems through thinking creatively and testing ideas. We will focus on how to use design thinking to build possibilities for your future education, career, and life. Courses are offered entirely online through technology with designated meeting times. Students who prefer class at a regularly scheduled time with instructor led, real time instruction via technology (e.g. Teams, Zoom, Collaborate, etc.), like this style. Students log in at the same time each class time. The frequency of designated meeting times varies by course and meeting times may be substituted with online learning.

<p>Courses are offered entirely online through technology with designated meeting times and designed for students who learn better with real-time instruction. Remote courses are similar to online courses except the student logs into class at their regularly scheduled time, and the instructor leads the course in real-time via technology (e.g. Teams, Zoom, Collaborate, etc). The frequency of designated meeting times varies by course. Meeting times may be substituted with online learning.</p>
