

Biology Club Event:

American Kestrel Nest Box Building

Help the Biology Club revitalize Kestrel populations!

In conjunction with American Kestrel Partnership and MK Nature Center, we will build Kestrel boxes to promote Kestrel population recovery on and near our campus. Our efforts will support Kestrel conservation and provide hands on learning opportunities with birds of prey for CWI academic programs and student organizations.

The event will feature several live bird presentations and Q&A sessions about Kestrels with a representative from the World Center for Birds of Prey. We hope to see you there!

When: Friday, Feb. 13th 2:00 p.m.— 6:00 p.m.

Where: NCAB Room 325

For additional information or to join the Biology Club, please contact rileyenlow@mycwi.cc or anniebaxter@mycwi.cc

You do not need to be a member to participate in this event.
