Operating System / Version: Windows 10

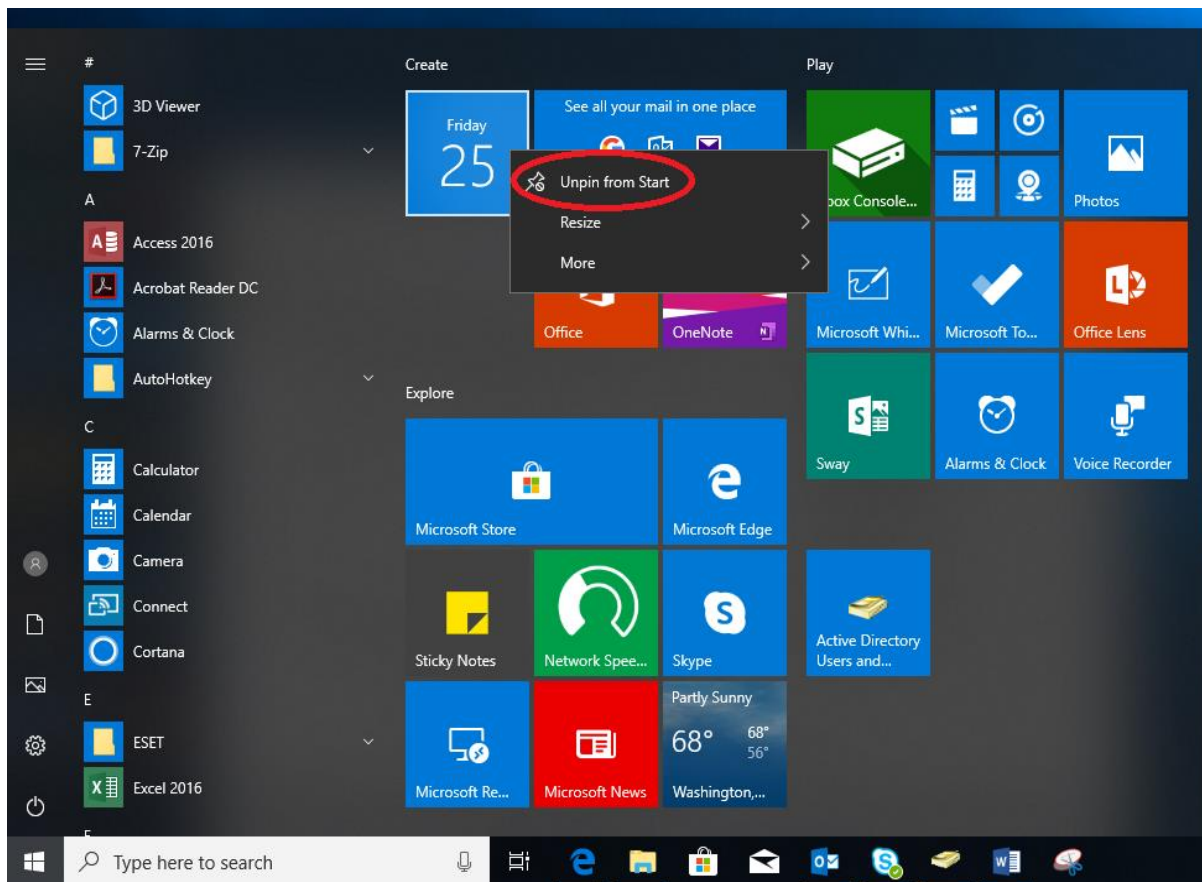

Application / Version: N/A

Hardware Version: N/A

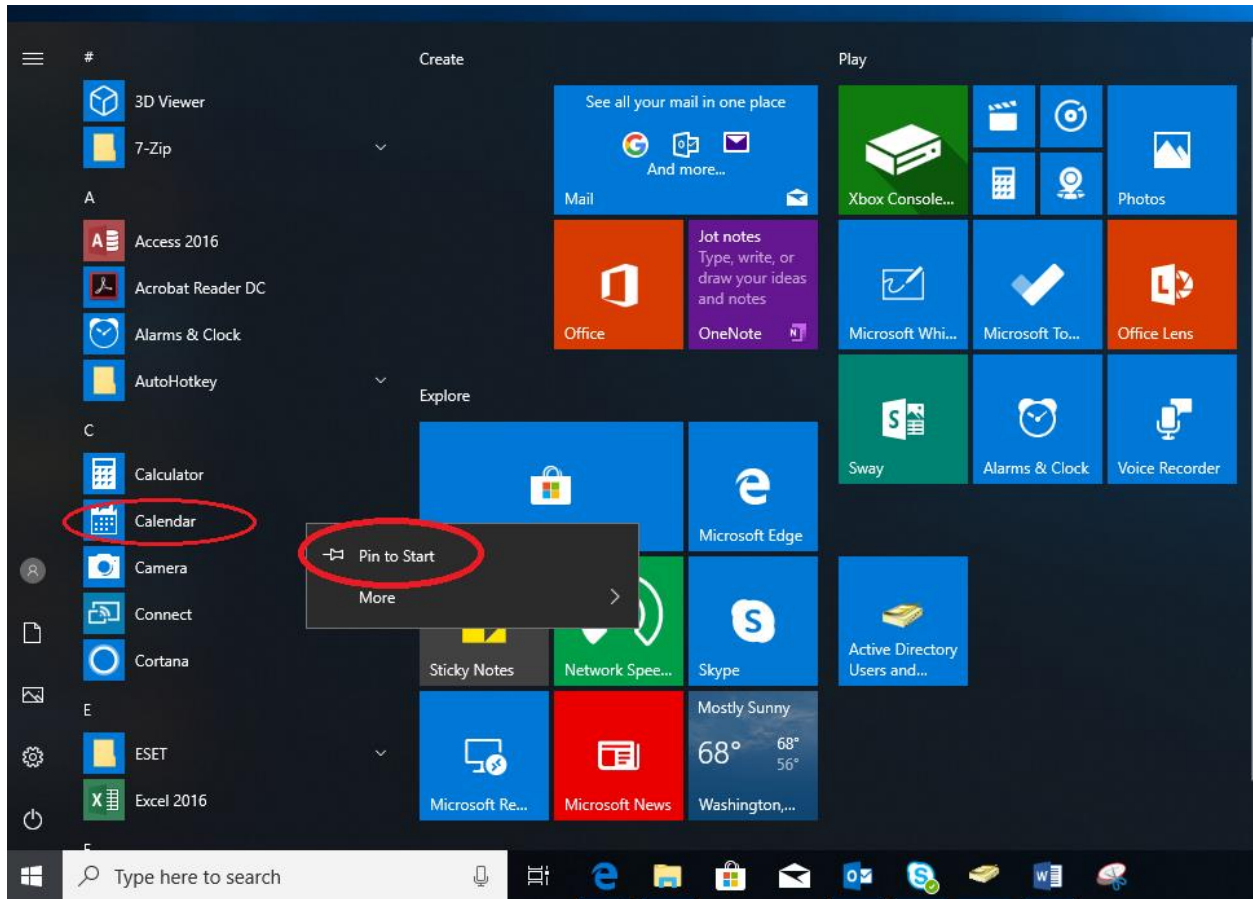

Summary: A Tile is a modern app’s representation on the Start menu and they can appear static or live. This document shows you how to customize Tiles from the Start menu on a Windows 10 computer.

Steps-to-Take:

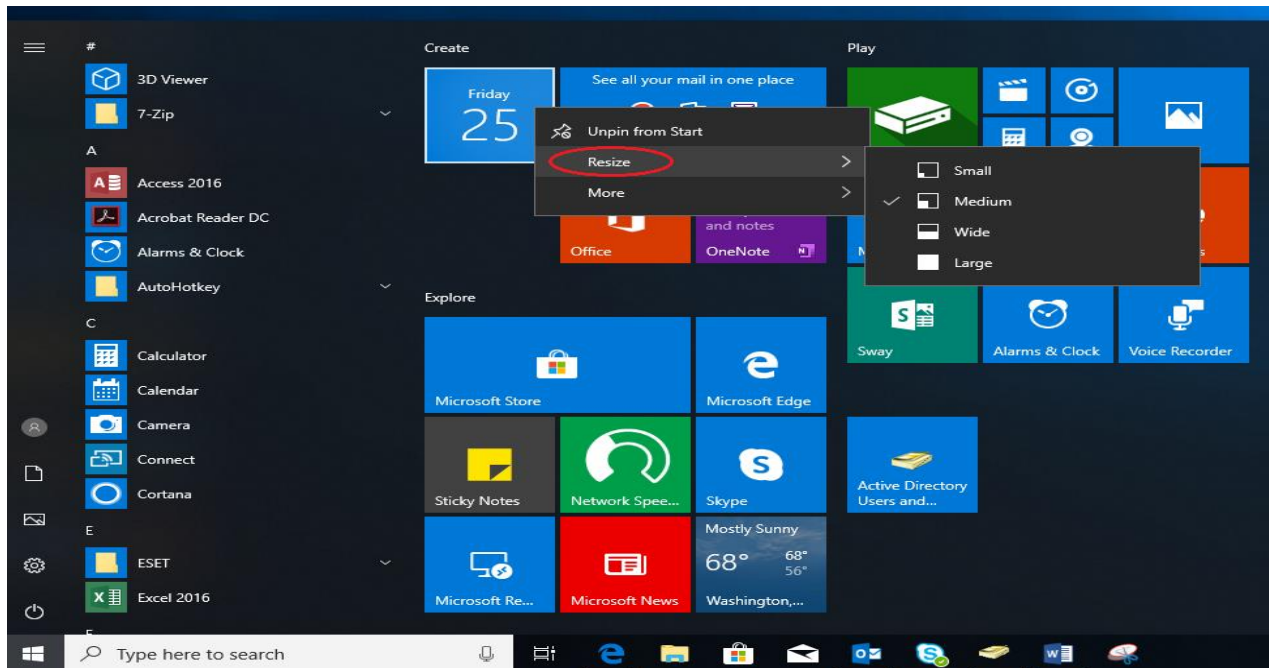

- 1) To remove a Tile, click on the Start menu in the lower left corner of the Desktop. To the right are the Tiles. Right-click on the Tile you want to remove and select “Unpin from Start”.

- 2) To add a Tile, open the Start menu and in the list of applications right-click on the app you want to add and select “Pin to Start”.

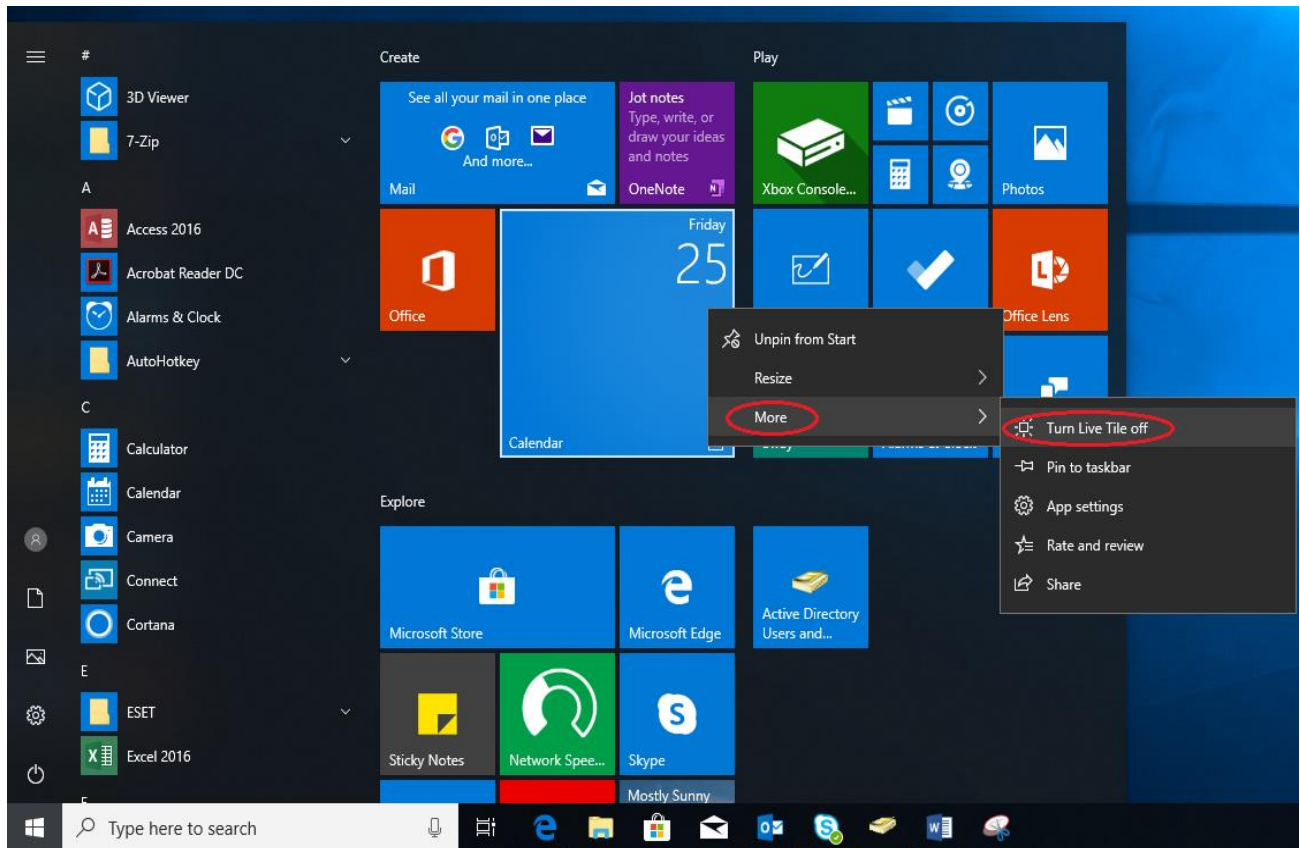

- 3) To change a Tile’s size, just right-click on the Tile you want to customize in the Start menu. Hover over “Resize” and choose from the list of sizes.

Additionally, you can drag and drop a Tile to rearrange their order however you like.

- 4) To change a Tile from live to static and vice versa, right-click on the Tile and hover over “More”. Then, select “Turn Live Tile off” or “Turn Live Tile on”.

From the “More” drop-down, you can also pin the app to Taskbar, access that app’s settings, rate and review, and share the app as well.
